# Digital Health Transformation Imperative

Why British Columbia is undergoing transformation of health care delivery towards better health outcomes.

## \$21 Billion

A year is spent on health care in BC, nearly 50% of direct provincial spend; these rising costs are not sustainable

## Misfocused

Health system remains largely focused on hospital and not remaining independent practices

## Siloed

Critical health information locked in systems or on paper. Making it difficult for care givers to provide coordinated end-to-end patient care across care continuum

## 20%

Of BC residents are living with two or more chronic conditions

## Disconnected

Patient services are too often fragmented, untimely, and inefficient

## Disparate efforts

Lack of coordination across health system to invest in improvements is further fragmenting efforts towards an integrated system of care

# Digital Innovation is Transforming Health Care

Disruptive yet vital role in tackling issues of sustainable, scalable and automated services to meet increasing demand.

## Three biggest disruptions:

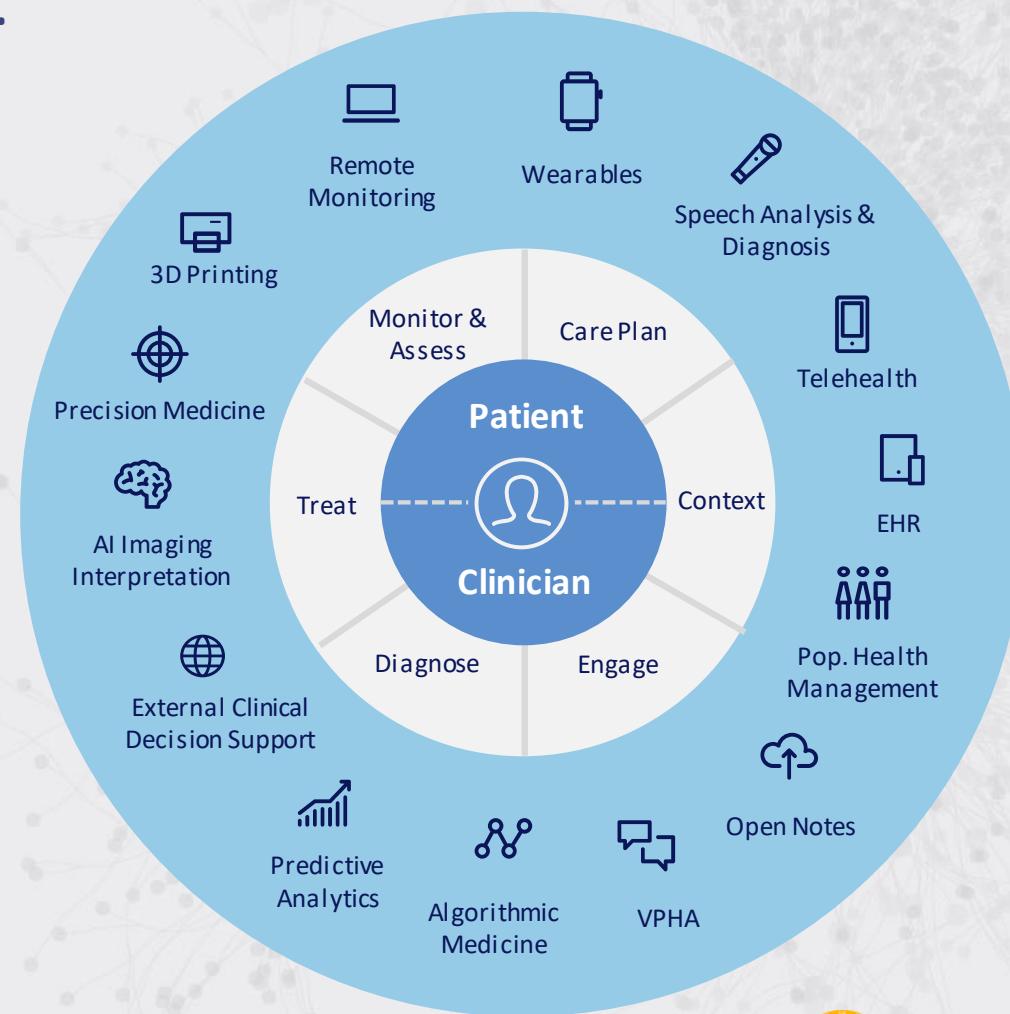

Explosion of consumer-centric health care to empower patients.

Digital access to health care which eliminates geographic barriers.

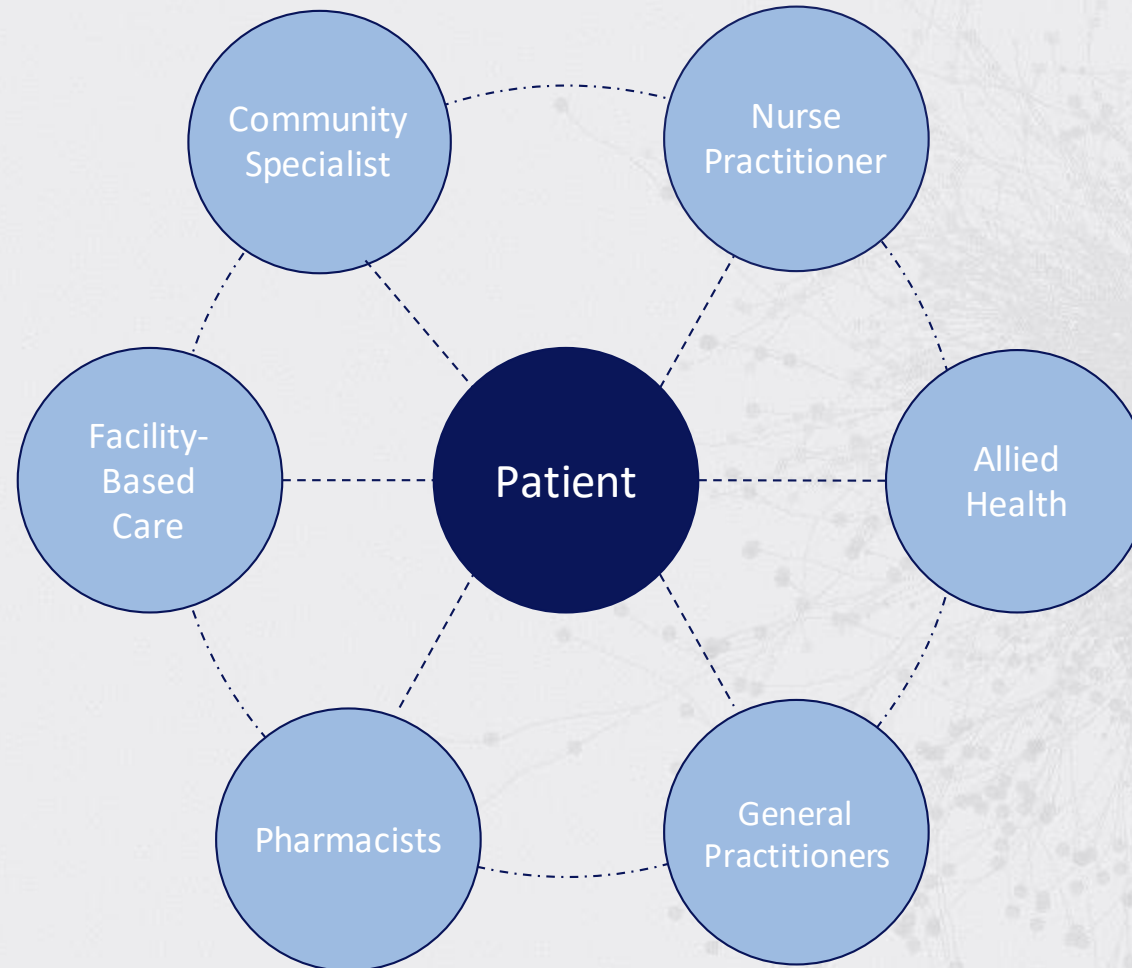

Advancements like precision medicine, artificial intelligence and analytics pivots health care to “wellness, prevention and self-management”.

# Our sector is shifting towards emphasis on team-based care

**As our priorities shift, we will need to break down traditional silos**

## Goals

### Patient Empowerment

Empower patients as partners in their care and wellness

### Integrated Care

Create an integrated and comprehensive team-based care experience for patients and clinicians

### Improved Care Team Experience

Build a culture of trust, collaboration and joy in work to support the care team in delivering quality health care

### Enhanced Decision Support

Provide timely, accessible, accurate information and tools to support clinical and system planning decisions

## Vision

Optimal health and wellness for every British Columbian

## Mission

Co-create an integrated and sustainable health care system that delivers improved health outcomes and embraces a culture of innovation, trust and partnerships

### Five Strategic Pillars to Digitally Enable Health Transformation

1

Empower Patients

2

Transform Primary, Specialist & Community Care

3

Transform Hospital-Based Care

4

Advance Analytics Capabilities

5

Enhance Foundational Clinical Systems

### Digital Health Foundation

Infrastructure

Policy and Standards

Privacy and Security

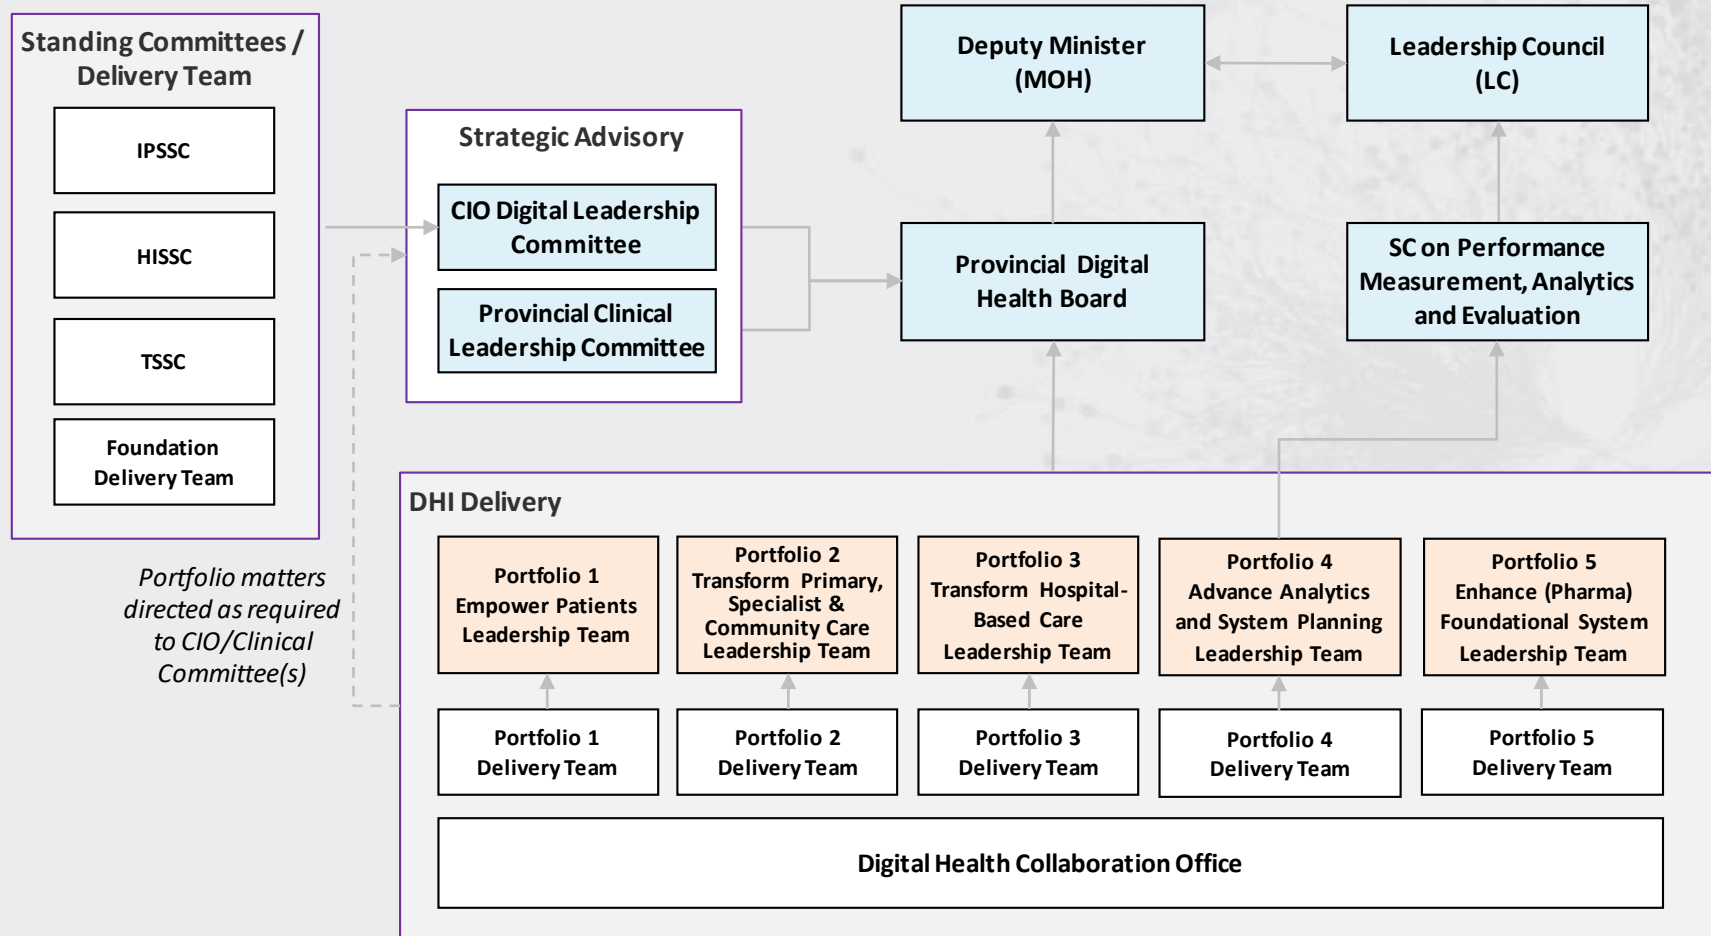

Identity Management

Architecture

### Digital Health Transformation Principles

Patient Experience • Provider Experience • Learning & Insight • Accessible & Appropriate  
Cost-Efficient & Sustainable • Supports Population Health Outcomes • Privacy & Security

# DHI governance structure – Year 1

Legend:

# Primary Focus: Digitization of Team-based Care

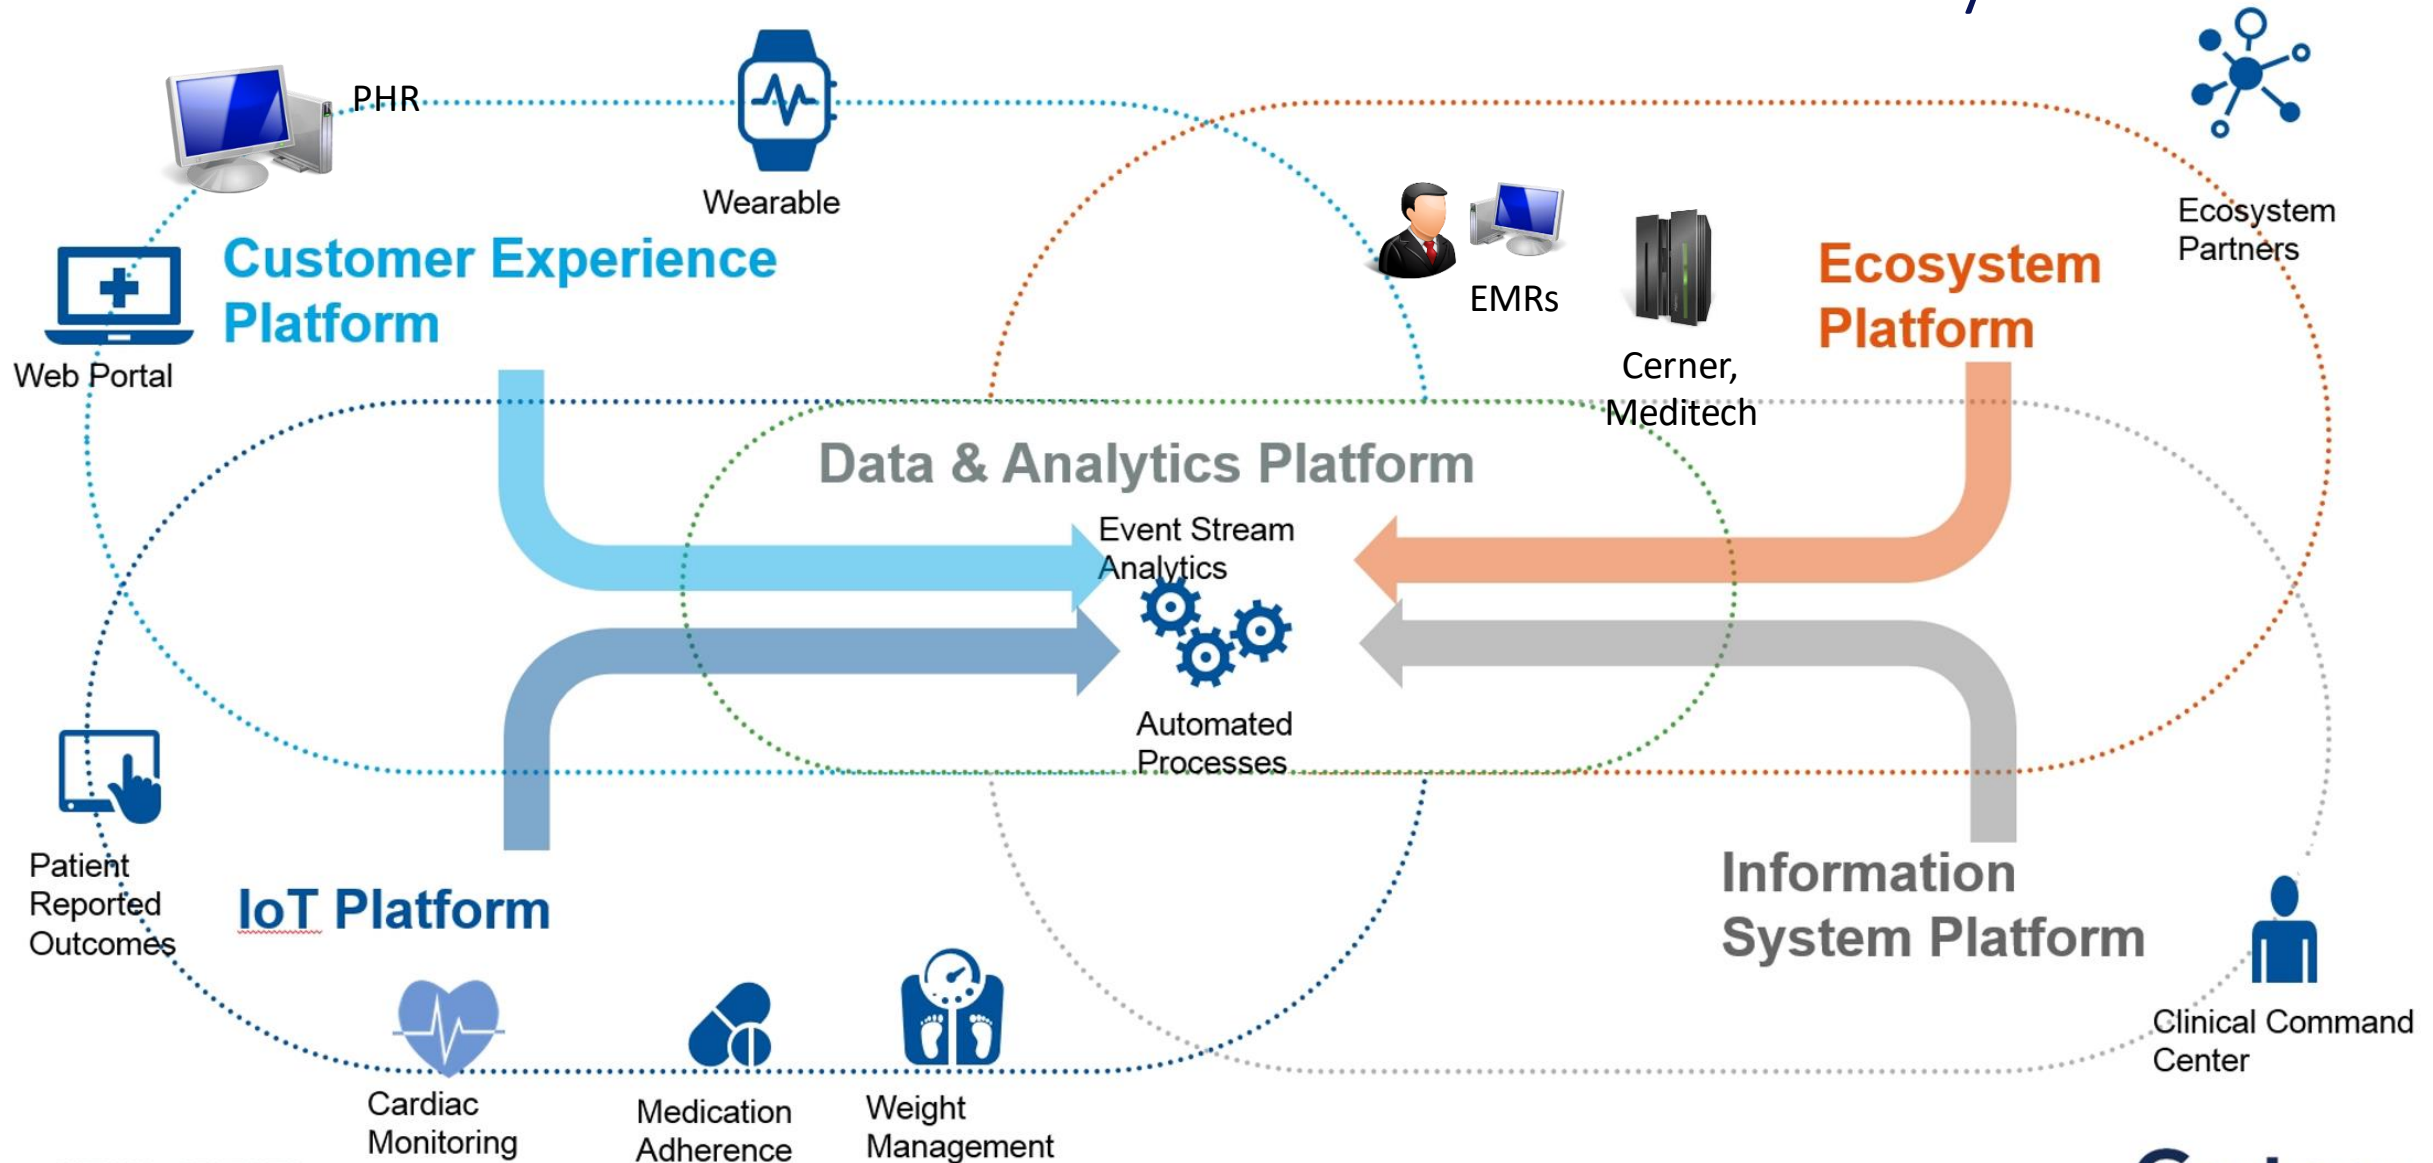

## Focus is collaborative development of:

- An ecosystems for patients and providers
- Platform for integrated, enhanced patient experiences & outcomes
- Access to all health info & services
- Open, standards-based architecture
- Integrates with wider health sector assets and private sector solutions
- Grounded BC in reference architecture
- Interoperable with diverse systems and tools

# Standards-based Multi-Vendor Platform Ecosystem

**Gartner**

# DHI Year 1 high-level priorities

**Year 1 focuses on creating an impact on patient empowerment and primary & community care, while also establishing a strong governance, policy, and technical foundation for the delivery of digital health in BC**

## Portfolio 1: Empower Patients

- Health Gateway Minimum Viable Product (MVP)
- Patient Access Strategy & Roadmap
- Virtual Care Policy Framework
- 1-2 Virtual Health Pilots
- Optimization of home health monitoring
- Mental Health & Substance Use Virtual Pilot

## Portfolio 4: Advance Analytics Capabilities

- Data quality improvement
- Health Data Platform
- Reporting Portal
- Health System Performance Mgmt Framework
- Data governance framework for Indigenous People's data
- Advancement from Descriptive to Predictive Analytics

## Portfolio 2: Transform Primary, Specialist & Community Care

- PCN IMIT Enablement Planning
- Activation of Priority Capabilities
- Innovation Acceleration Centres (IACs)
- Provincial Digital Solutions Toolkit
- Provincial EMR Vendor Management Strategy

## Portfolio 5: Enhance Foundational Clinical Systems

- End-to-end Pharmaceutical Business Strategy
- PharmaNet Roadmap and Priorities

## Portfolio 3: Transform Hospital-Based Care

- Various, in collaboration between Health Authorities and PHSA

## Digital Health Foundation

- Reference Architecture
- Enterprise IDAM Strategy and Roadmap
- Expansion of Priority Capabilities (CDX and CareConnect) and Evaluation of Provincial Scalability
- Provincial privacy & security standards & policy

Some pending approval

# Areas of Early Exploration

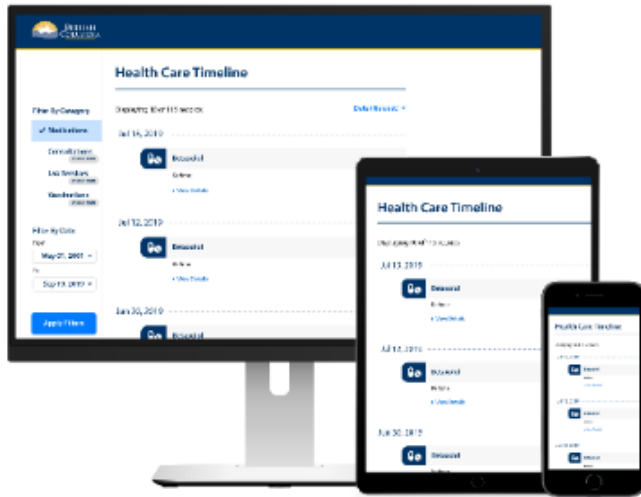

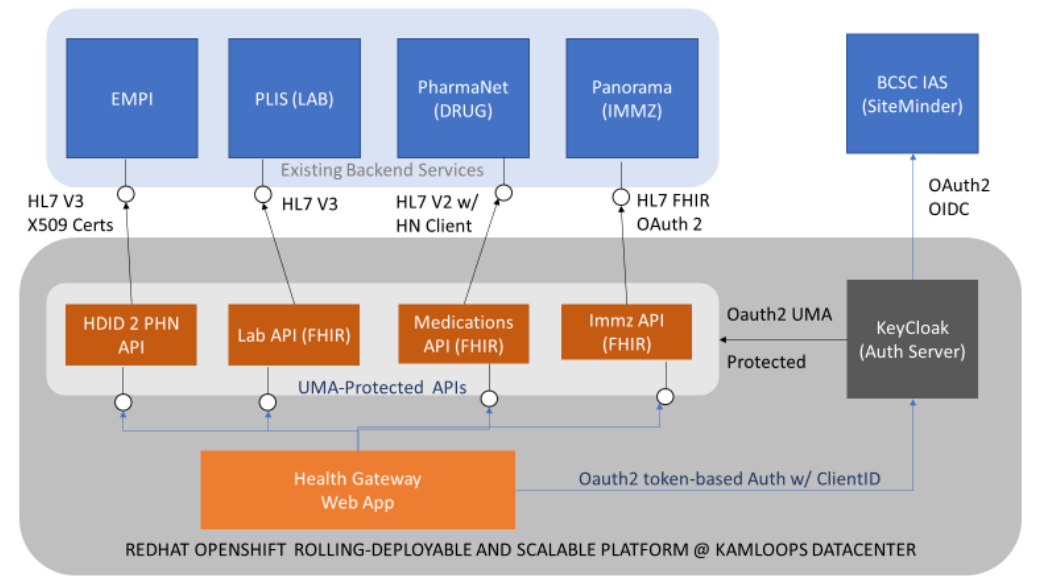

# HealthGateway

Empowering you to manage your health

Branding TBD

Wireframes for  
target MVP

## A single place to view your health records

Visits to clinics, lab test results, prescription medications, and vaccinations.

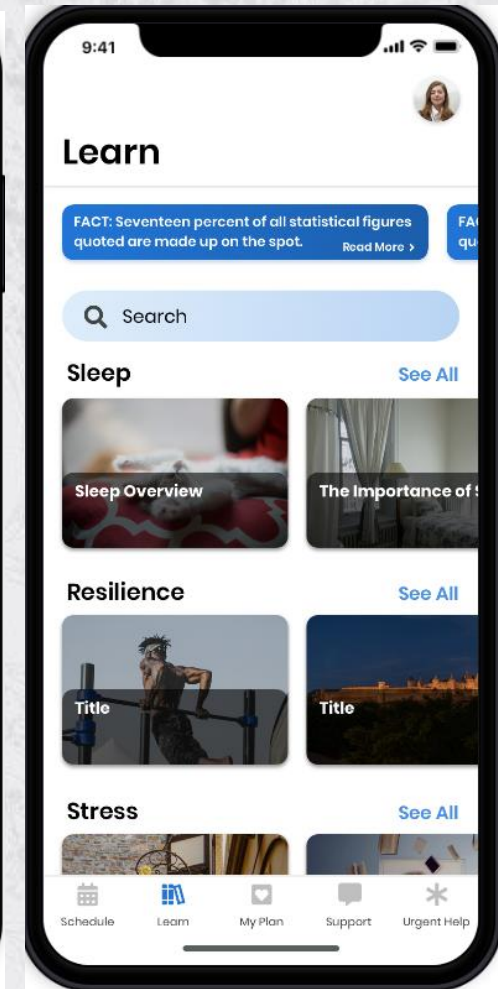

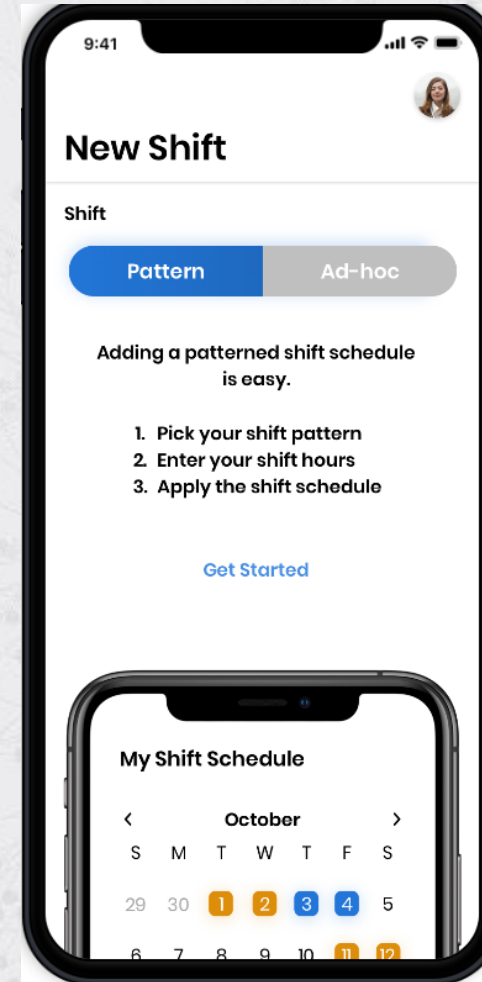

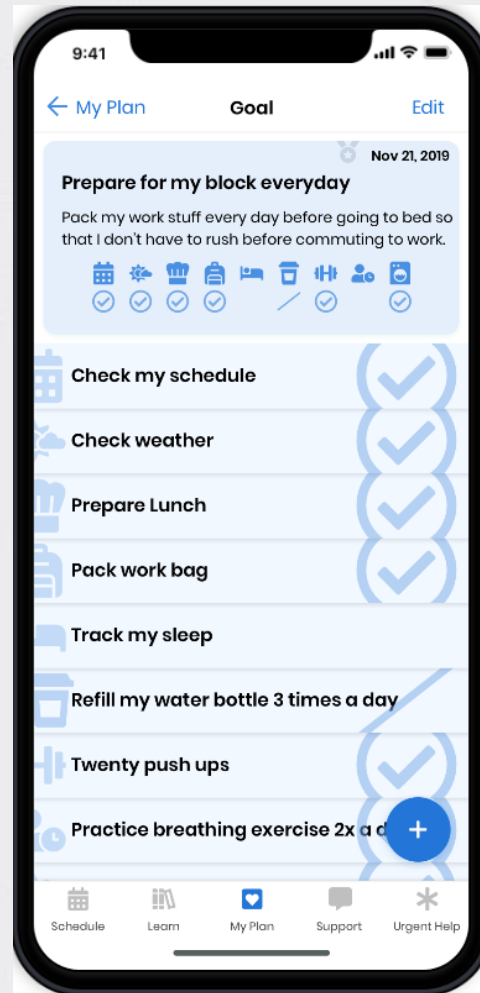

Documented and published on [GitHub](#)

Prototype

# BCEHS Application

## Specific content, interactive tool for shifts, and more

- Co-designed by BC EHS employees and the Critical Incident Stress Program
- Developed and reviewed by trauma trained clinicians
- Tools, content contextually linked with schedule
- Reminders and trackers create a highly interactive experience

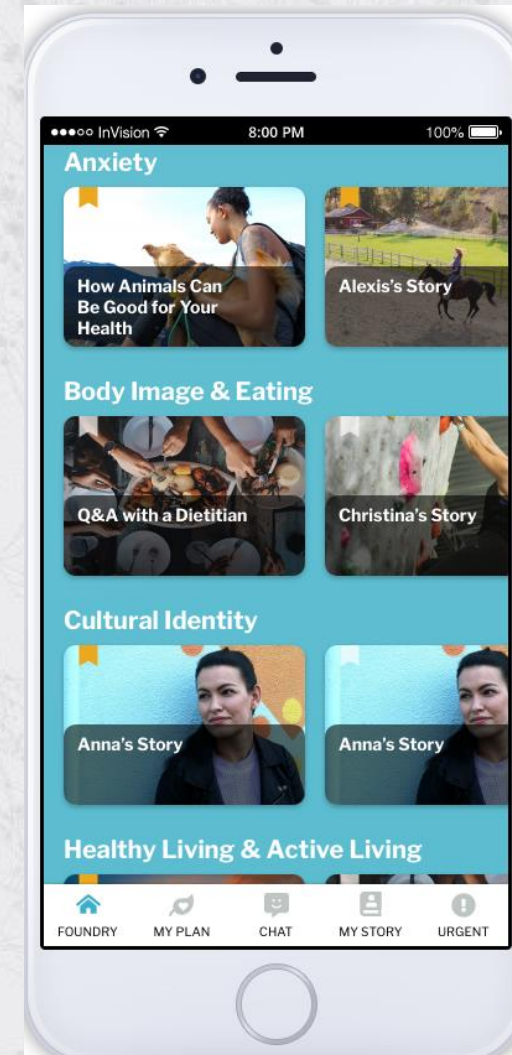

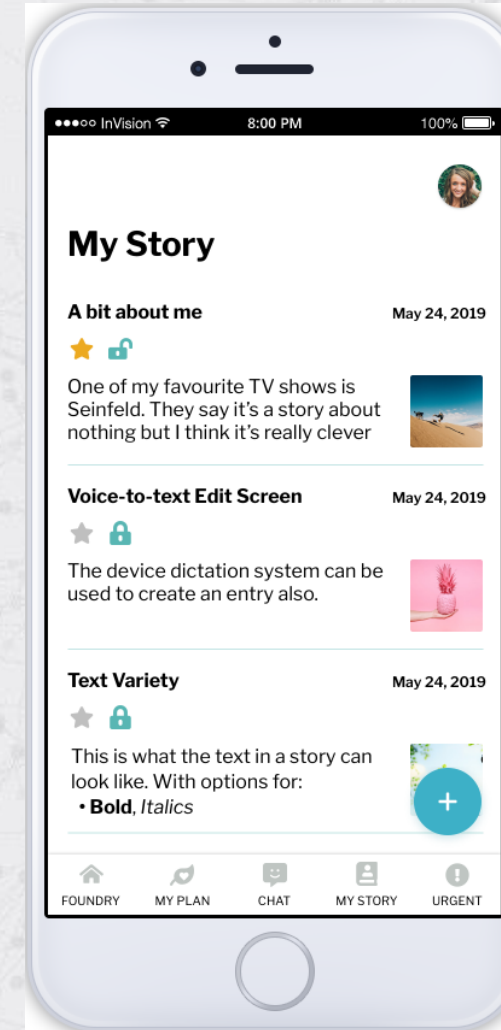

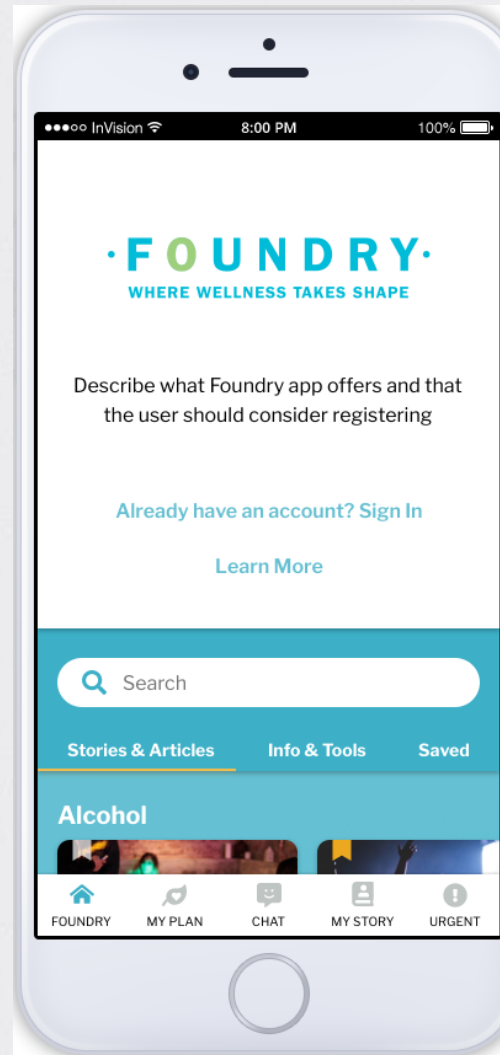

Prototype

# Foundry/BCCH

## Targeted content, services and peer support

- Co-designed by the project's Youth Advisory Committee
- Intuitive, easy to use
- BC Children's Hospital provides content
- 'Favourite' articles for off-line viewing
- Mobile friendly
- In-app Action Plan, Goals, chat (to peers & counsellors)

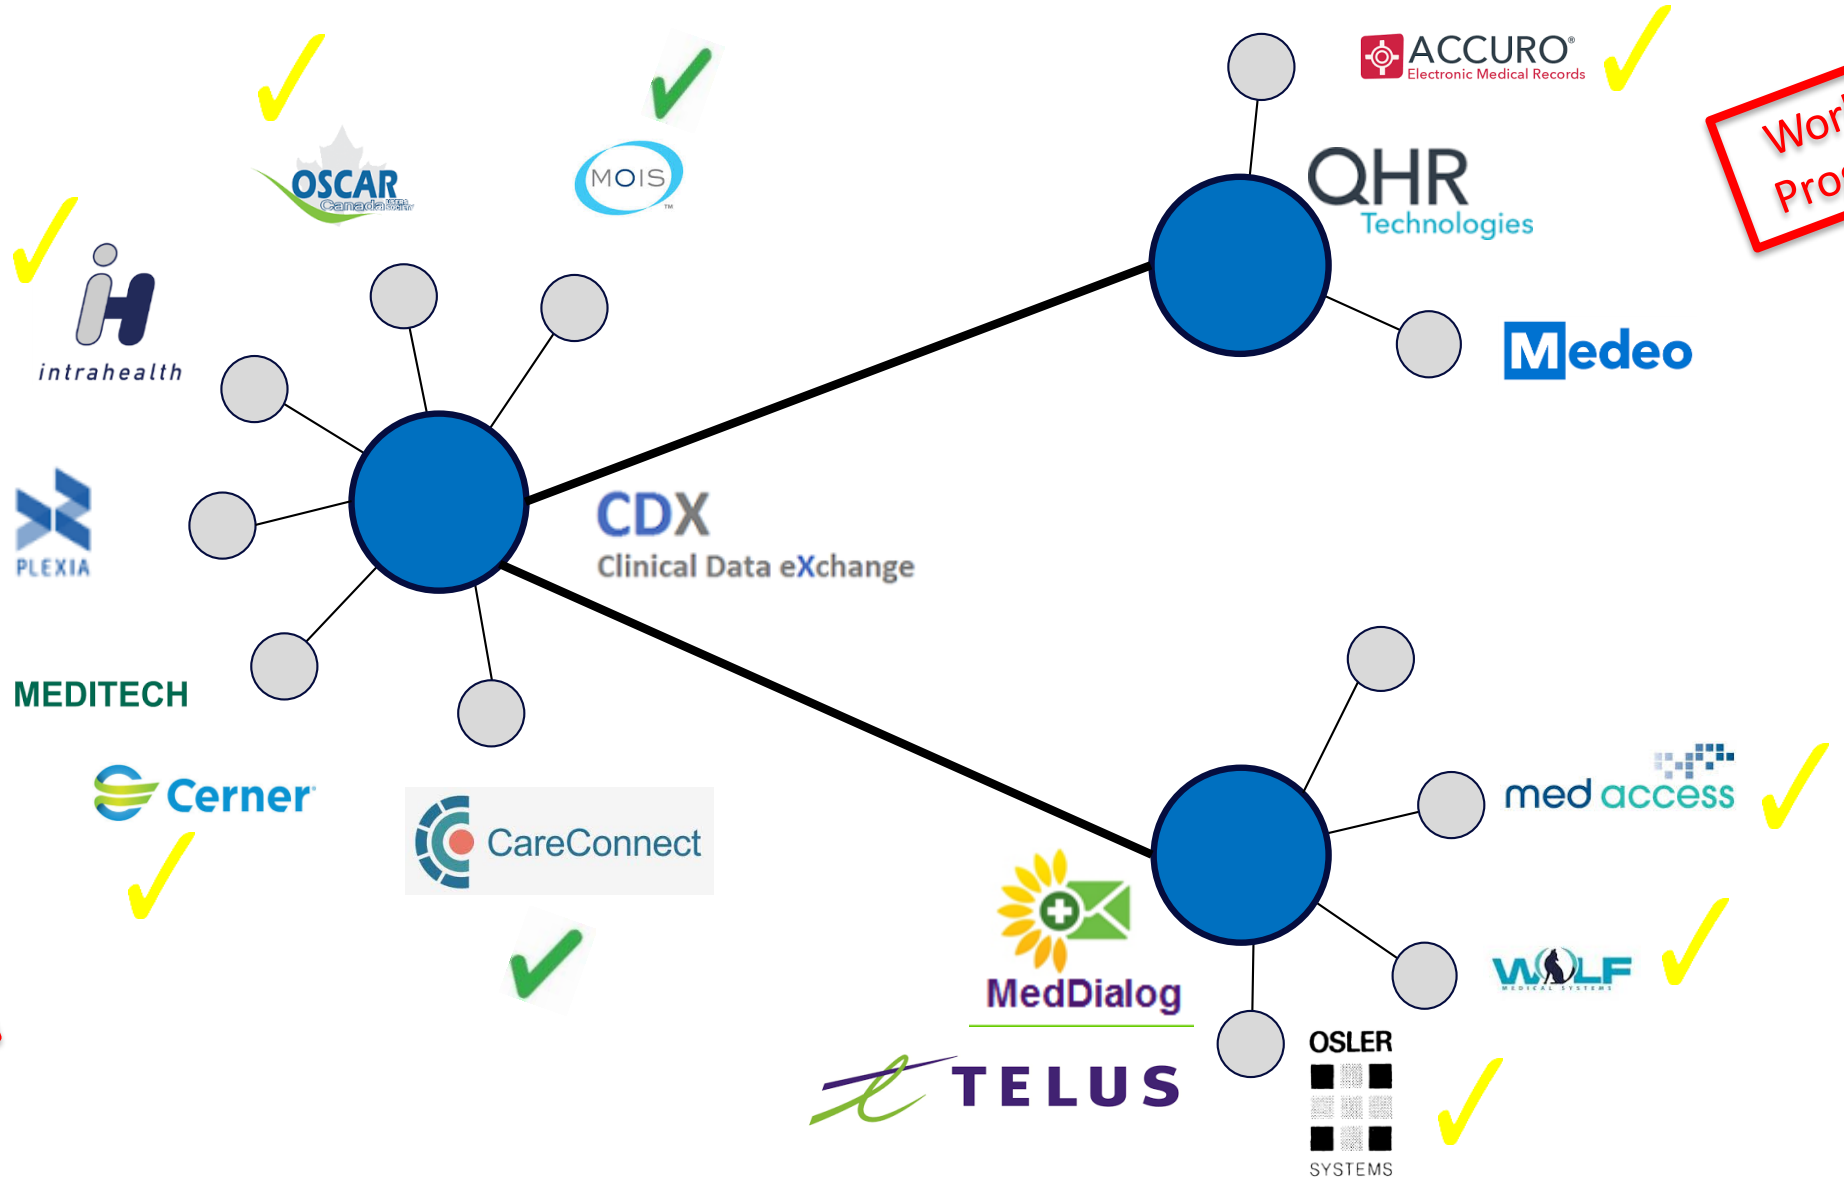

# Evolving Information Exchange Capabilities

- ✓ Complete
- ✓ Development Underway

Work in Progress

Scalability assessment underway

# Expansion of CareConnect Access

- ~2-5 seconds (including logging on for the first time during a session) for physician to get from patient record in EMR to patient record on CareConnect.

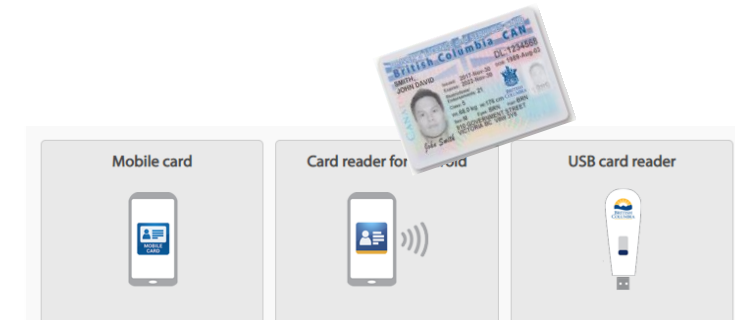

EMR VENDOR REPRESENTATION IN VCH

## “Rapid Access” Integration Status

- **Integration Complete**
  - Telus Med Access
  - Telus Wolf
  - Intrahealth
  - Oscar
  - Plexia
- **Integration Pending**
  - QHR Accuro

- Integration between EMRs in Private Practice and CareConnect leverages PPN
- The PPN is available to all clinics in BC that use a cloud-based EMR

# Expansion of CareConnect Content

Results for: all dates

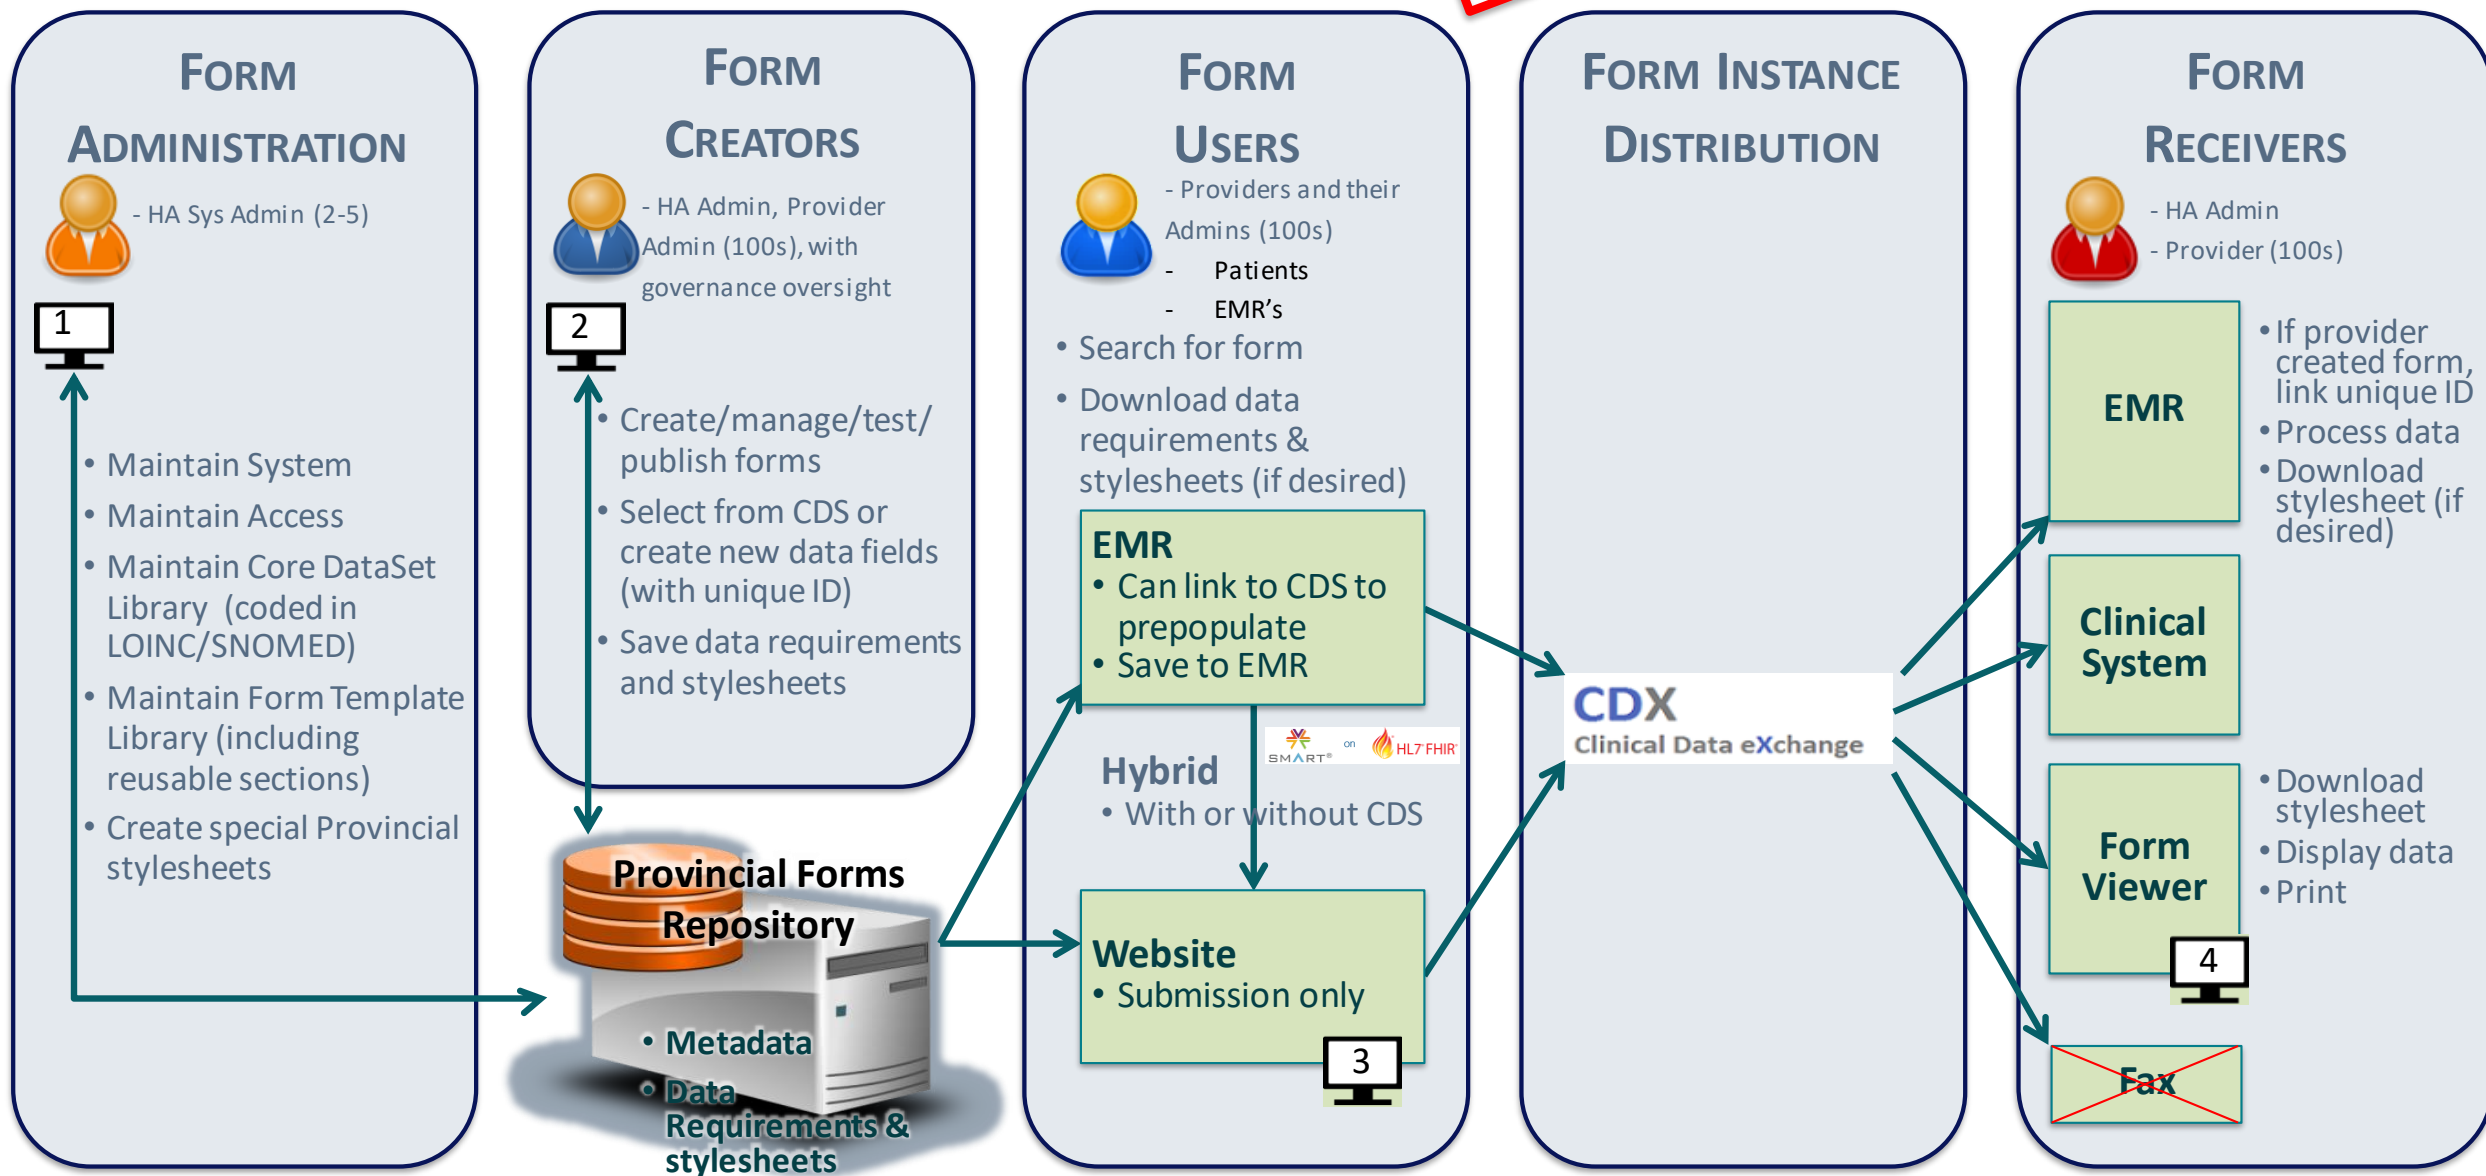

DISCLAIMER: Only VCHA PARIS notes and assessments completed within the last year are available. Please see “What’s Available” for details.

DATE	DOCUMENT TYPE	TEAM/SERVICE	SOURCE SYSTEM
2017 JUN 19	Home Support Plan - Revised	PARIS System Client Information	FHA PARIS
2017 MAY 03	Facesheet Report	Psychiatrist & MHSU GP Services	FHA PARIS
2016 JUN 19	CASE NOTE		FHA PARIS

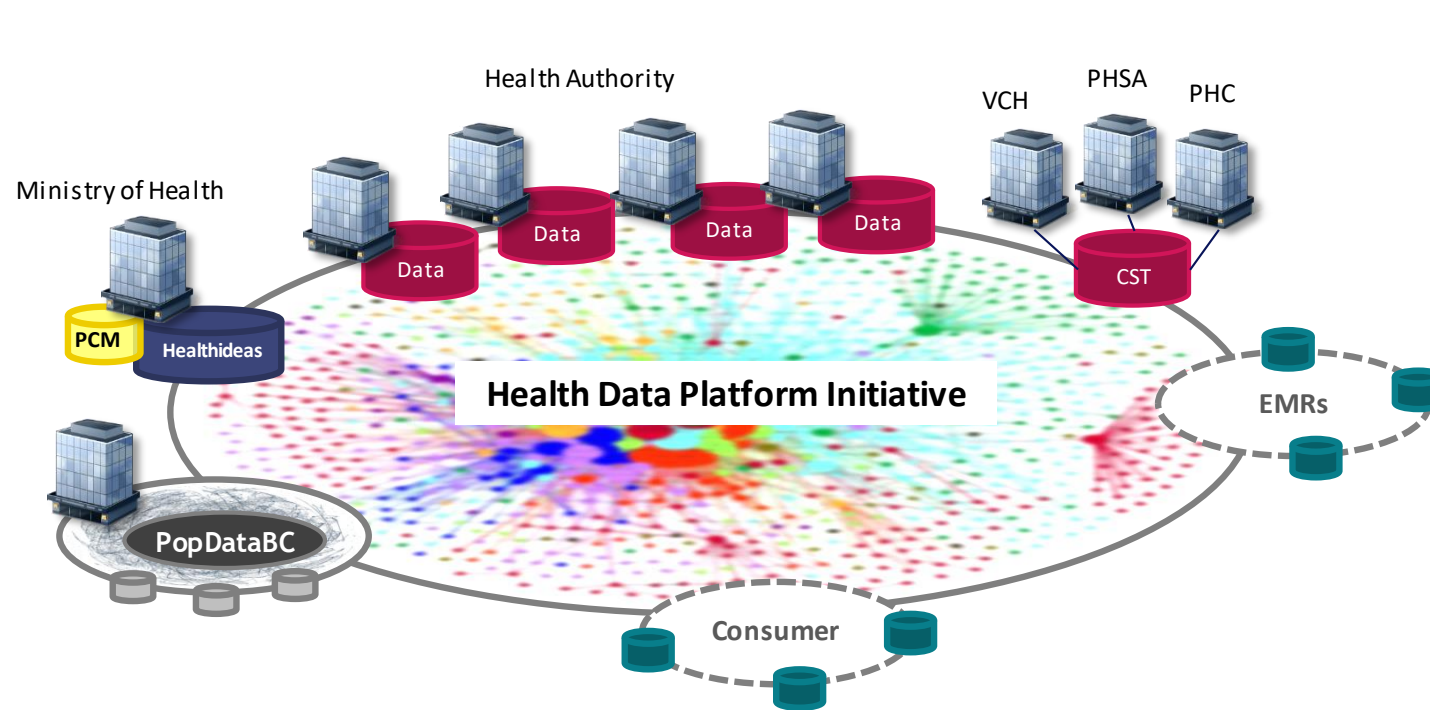

# PHSA Prototype eForms Solution

Draft

# Health Data Platform

- BC provincial analytics platform, public asset, led by MOH
- Distributed governance with local data stewards, local control
- Federated system, on-demand discovery & aggregation
- No central data lake/warehouse
- Trusted external third party doing linking, de-identification
- Streamlined data access processes

# PCN Digital Capability Bundles – Short Term Direction

## Info sharing for providers

Send info between EMRs/CIS  
eReferral, eConsult  
CareConnect access in PCN  
Richer content in CareConnect

## Digital workflow tools

ePrescribing  
Electronic forms

**Draft**

## Info sharing for citizens

Citizen Health Gateway

## Communications for providers

Secure communication across care team  
Interoperable telehealth  
Record conversations in EMR/CIS

## Communication for citizens

Secure communication with patients  
Send copy of conversation to PHR/email

## Core analytics

Practice-level QI capabilities

## Advanced analytics

Linkage of data for cross-team QI  
Integration with Health Data Platform

# Questions?
